ABOUT ME

Full Stack Software Engineer with 6+ years of experience developing interactive 3D applications and browser-based visualization tools using React.js, TypeScript, Three.js, Node.js, Unity3D, and PlayCanvas. Experienced in building responsive web applications, designing reusable React components, developing REST APIs, integrating real-time 3D rendering, and optimizing application performance. Strong understanding of WebGL, 3D mathematics, state management, and scalable software architecture.

EDUCATION

2020 - 2022

M.Tech in Computer Science

Kallam Haranadha Reddy Institute of Technology

2016 - 2020

Bachelor of Technology (B.Tech) in Computer Science

Kallam Haranadha Reddy Institute of Technology

EXPERIENCE

April 2023 - NOW

Senior Game Developer

Cognitivebotics

At Cognitivebotics Technologies Private Limited, Developed responsive, browser-based interactive educational applications using React.js, TypeScript, Three.js, and PlayCanvas, building reusable React components with Hooks and modern state management. Designed and integrated interactive 3D visualizations featuring camera controls, object transformations, zoom, pan, and rotation to deliver engaging user experiences. Developed Node.js (Express) REST APIs for data management and seamless frontend-backend communication while optimizing rendering performance, application responsiveness, and asset loading through code splitting, lazy loading, and rendering optimizations. Collaborated closely with psychologists, designers, and cross-functional teams to deliver scalable, high-performance web applications.

Oct 2022 - Mar 2023

Senior Associate Software Developer

Yugasa Software labs

As a Senior Associate Software Developer at Yugasa Software Labs, Designed and developed a browser-based 3D interior design platform using Unity, Three.js, React.js, and TypeScript, enabling interactive scene visualization and editing. Built reusable React components for property editing, material selection, and scene management, while developing Node.js backend services for project storage and asset management. Implemented advanced 3D object manipulation features including translation, scaling, rotation, snapping, and camera controls, leveraging coordinate systems, vectors, matrices, and quaternions for precise transformations. Collaborated closely with UI/UX designers and clients to gather requirements, managed a team of five developers, and optimized application performance to deliver a scalable and intuitive 3D design solution.

Aug2020 - Oct2022

Unity Developer

Practically

I began my career at Practically, an EdTech company, where I initially joined as an intern. Within a month, I was offered a permanent position as a Junior Developer, and after a year, I was promoted to Unity Developer. During my time at Practically, I was actively involved in developing educational games and interactive content using Unity. I also contributed to the creation of reusable templates to streamline game development processes. In addition, I gained hands-on experience with the PlayCanvas game engine, working with JavaScript to build web-based games, further expanding my skill set in cross-platform game development.

Feb 2020 - July 2020

Junior Unity Developer

3rd Flix Visual Effects

Started as an intern by building a strong foundation in core mathematical concepts, including roots of unity, while developing analytical thinking and problem solving skills.

SKILLS

Frontend

- React.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- React Hooks
- Context API
- Redux / Zustand
- Material UI
- Tailwind CSS

3D Technologies

- Three.js
- WebGL
- React Three Fiber
- Unity3D
- PlayCanvas

Backend

- Node.js
- Express.js
- REST APIs
- GraphQL
- WebSockets

Databases

- PostgreSQL
- MongoDB

DevOps & Tools

- Git
- Docker
- CI/CD
- npm
- Vite
- Webpack

Other

- Performance Optimization
- 3D Mathematics
- Agile

PROJECTS:

Browser-Based 3D Visualization Platform

Tech: React.js, TypeScript, Three.js, Node.js

- Built an interactive 3D visualization application with zoom, pan, rotate, and multiple camera views.
- Implemented object editing including move, rotate, and scale.
- Optimized rendering performance for large 3D scenes.
- Developed REST APIs using Express.js.

Interactive Interior Design Tool

Tech: Unity, React, Node.js

- Developed a 3D room planner with drag-and-drop furniture placement.
- Implemented real-time object manipulation.
- Integrated backend APIs for project persistence.

Educational Interactive Platform

Tech: React, TypeScript, Three.js, PlayCanvas

- Developed browser-based educational experiences with interactive 3D content.
- Improved loading performance and rendering efficiency.

DECLARATION

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief. I am confident that my skills, experience, and dedication will contribute positively to the role I am applying for. I am eager to contribute to the success of the organization and am looking forward to the opportunity to further discuss how I can add value.
